Relevant, Immersive Learning for ALL Students

Room: Andover

Four microschool leaders and founders of independently formed schools will share their favorite moments, their shoulda/woulda/coulda moments, and what their vision is for the future of their microschools. These panelists represent young microschools navigating the freedom and innovation that comes with it. Microschools empower educators to transform everyday learning. Microschools have the opportunity and flexibility to offer a unique and innovative approach to education that not only allows for meaningful learning but also enriches the child's life through powerful experiences. This approach to learning requires the space and time for learners to navigate their world authentically. Hear what their students and parents are saying about the changes they have made and why they love it! Bye-bye heavy textbooks, boring lectures, and standardized tests, hello world! As students grow, learning should continue to be positive and engaging - come learn how to make that happen.

Join EdChoice senior research analyst John Kristof as he catches you up on the movement of programs allowing public funds to flow to private K-12 educators. Using interactive polling technology,ho

Academic Research on Hyb

In this session, we will examine recent and ongoing academic research focused on Hybrid Schools, with topics focusing on the evolving characteristics of hybrid schools and their students, and the characteristics of successful hybrid schools.
